

Go beyond a basic landline or mobile

NBN-ready and loaded with handy features, Virtual PBX runs your office phones through the internet. So you can work flexibly and productively, without the traditional costs and limitations of an on-premise PBX phone system.

Features

Voicemail to email

Listen to office voicemail on the go. Have your voicemails automatically emailed to you as audio files.

Direct & manage calls

Handle calls at the press of a button. Hold and transfer, or park a call and pick it up on a different phone.

Time-of-Day Routing

Create different caller experiences during 'business hours' and 'after hours' – customised to your own schedule.

Call forwarding

Pass calls to another person. Choose to send incoming calls to a different landline or mobile number.

BYO phone numbers

Don't lose your phone numbers when you switch to MyNetFone. It's **free** to transfer your existing phone numbers.

Conference calling

Bring your team together. You can easily setup a 3-way conference call between your number and two others.

Line Hunt / Ring Groups

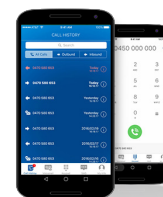

Create groups of users (like Sales or Accounts) and have calls ring them at the same time, or one after the other.

Auto attendant (IVR)

Call greeting with a customisable voice menu to direct calls. E.g. Press 1 for Sales, Press 2 for Accounts.

Line pooling

Save money and avoid 'per handset' pricing traps

Mobile App

Get a landline on your mobile. Make, receive, hold and transfer calls via the app.

Basic office handset \$189.95 (outright)

12 line keys, speakerphone, headset port and a black-and-white screen. Ideal for general office use.

Gigabit handset \$229.95 (outright)

Everything included with the basic model, plus 2 gigabit ethernet ports. Suitable for networked offices.

Colour handset \$329.95 (outright)

All features of the gigabit model, plus 10 extra line keys and a 4.3" colour screen. Perfect for power-users.

With Cloud Phone you aren't limited to a single office location. Connect your main office, regional branches and even home offices into a single centrally-managed phone system.

myNetFone
Business

MyNetFone operates its very own IP communications network. Our modern voice network uses NBN-ready technology that avoids the costs and complexity of the old-fashioned telcos.

Grow your business without limits
